**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7 and 13-19, drawn to converting one-bit per pixel images to multiple bits per pixel images to combine images into a resulting one-bit per pixel image, classified in class 345, subclass 599.
  - II. Claims 8-12 and 20-25, drawn to overlaying stipple patterns onto an image to create a composite stippled image, classified in class 345, subclass 599.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as creating a stipple pattern, without converting to a multiple-bit per pixel image as an intermediate step. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Michael J. Buchenhorner on February 2, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Examiner left a voice message for Mr. Buchenhorner but the call was not returned.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### ***Conclusion***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
